Self Employed Business Started in 1994 – Current | Concurrently performing 1994 - Present
Senior Web Design Engineer
Webmaster, Web Designer, Web Developer

Contracted by clients to design and deploy published websites for use on the World Wide Web through web development company providing services to small businessmen. Site development includes site design and organization, content layout, site navigation, domain name registration, search engine registrations, merchant account development, shopping cart installation, Search Engine Optimization, AdWords development, and credit card and payment processor development. Currently, I have designed and developed over 935 commercial grade websites ranging from the family photo album to classified government websites for the Department of Energy along with university level websites for Regis University, University of Colorado, Boulder and, University of Alaska Anchorage. Websites have been built using 6 different CMS platforms to include, (10) HyperCard, (20) Dreamweaver, (300) HTML, (360+) .ASP, (252+) DotNetNuke, and (86) WordPress.

Alaska Native Tribal Health Consortium & Alaska Native Medical Center (ANTHC & ANMC)
www.anthc.org
10/06/2014 – 9/28/2018 - 4yrs.
Webmaster, Web Designer, Web Media Specialist

The initial focus for this position was to migrate the current websites used by ANTHC from a SharePoint CMS platform to a WordPress CMS platform. This involved the content migration of over 500 pages from current websites to WordPress websites while maintaining the corporate branding and design standards as accurate as possible. Under limited supervision, responsible for designs, developments, and deliveries of multiple websites for ANTHC while supporting ANTHC communications and marketing projects by taking graphics or other visual and descriptive collateral developed by ANTHC staff and applying it to the web. The primary design platform has been the WordPress platform using different themes, plugins, and basic design layouts for a medical community encompassing a 150 bed hospital and supporting medical outpatient clinics. The technical tools have included the WordPress CMS platform, Bootstrap, CSS3, javascript, Divi Theme, PHP, HTML, HTML5, CSS, and multiple plugins to perform numerous duties supported by graphics designed using the PhotoShop CS platform.
